Udemy

OBJECTIVE

Proficient in Python for writing clean and efficient scripts, handling file operations, and working with data structures like lists, dictionaries, and tuples. Skilled in React development with hands-on experience in building dynamic and user-friendly web applications. Knowledgeable in React hooks, state management, React Router and props to create interactive user interfaces. Possess basic knowledge of Java and a keen interest in learning and contributing to projects while tackling challenges effectively.

PROJECTS

My Portfolio

- **Deployment** - portfolio-ombhavsar-projects.vercel.app
- **Technologies Used** - React, TailwindCSS, JavaScript, HTML.
- Divided into reusable and modular React components for ease of maintenance and scalability.
- Leverages Tailwind CSS to achieve quick and effective styling solutions.
- Ensured components were flexible and reusable by effectively utilizing props.
- Configured for continuous deployment with automated build processes on Vercel.

Voice

- **Deployment** - voice-ecommerce.vercel.app
- **Technologies Used** - React, JavaScript, HTML, CSS, MongoDB, Express, Node.js, JWT, Stripe.
- Developed a fully functional e-commerce website specializing in TWS headphones and smartwatches using the MERN stack, featuring product browsing, a shopping cart, and secure checkout.
- Created a robust authentication system using JWT for secure user access and session management.
- Integrated a payment gateway (Stripe) to facilitate secure transactions.
- Designed a user friendly interface using Tailwind CSS
- Incorporated inventory management and an admin panel for efficient product management, user registration, and support handling.
