OBJECTIVE

Skilled in React development with hands-on experience using hooks, state management, React Router, portals, and props to build dynamic and responsive web applications. Possess basic knowledge of Java and Python, and eager to learn and contribute to projects, tackling upcoming tasks and challenges.

PROJECTS

Tic-Tac-Toe Game

- **Deployment** - tic-tac-teo-ombhavsar-projects.vercel.app
- **Technologies Used** - React, JavaScript, HTML, CSS.
- Implemented stateful components to handle dynamic data and user interactions.
- Utilized React hooks for efficient state management and functional components for reusability.
- Ensured components were flexible and reusable by effectively utilizing props.
- Developed a responsive and interactive user interface using React components.

Voice

- **Deployment** - voice-ecommerce.vercel.app
- **Technologies Used** - React, JavaScript, HTML, CSS, MongoDB, Express, Node.js, JWT, Stripe.
- Developed a fully functional e-commerce website specializing in TWS headphones and smartwatches using the MERN stack, featuring product browsing, a shopping cart, and secure checkout.
- Created a robust authentication system using JWT for secure user access and session management.
- Integrated a payment gateway (Stripe) to facilitate secure transactions.
- Designed a responsive user interface using Tailwind CSS, ensuring a seamless experience across devices.
- Incorporated inventory management and an admin panel for efficient product management, user registration, and support handling.
